MR. GERALD OKOTH

PROFESSIONAL SUMMARY

A passionate software engineer with a BSc. in Mathematics and Computer Science, and a strong foundation in leadership, empathy, communication, and collaboration. I specialize in designing and building user interfaces of web applications that blend clean, scalable and maintainable code with intuitive and visually engaging UI. I am committed to continuous learning and career excellence while advancing both professional and technical skills.

WORK EXPERIENCE

ALX Africa (Remote)   JAN - SEP 2025

- Developed 5 web applications using HTML, CSS, TailwindCss, JavaScript, and React.
- Applied agile methodologies in remote team collaborations and pair programming sessions.
- Designed wireframes and mockups with Figma and Miro, prioritizing intuitive UI and accessibility.

Machakos University — ICT Department   MAY - AUG 2024

- Provided technical support to faculty and students, resolving hardware/software issues across departments increasing operational efficiency.
- Led the maintenance and setup of computer labs, enhancing network connectivity and device functionality for improved user experience.
- Troubleshot LAN/WAN configurations and software installations, enhancing network reliability and minimizing downtime.

Independent Electoral and Boundaries Commission (IEBC)   2022 AUG - Polling Clerk

- Oversaw voter verification, ballot issuance, and data entry at a polling station serving over 1,000 voters.
- Ensured strict adherence to electoral laws, promoting transparency, fairness, and voter confidence.
- Facilitated collaboration with polling officials to ensure seamless logistics and conflict-free operations.
- Demonstrated integrity, confidentiality, and leadership throughout the electoral process.

PROJECTS

- **Konnect App (Fourth year Project):** Designed and developed user interface for Konnect App, a ride-hailing application developed to solve local transportation challenges within Campus environs.
- **Weather Dashboard (ALX capstone project):** A weather application that that allows users to search and view real-time weather data for cities worldwide.. Integrated the OpenWeather API to fetch and display data such as temperature, weather conditions, and location details. My role focused on building a responsive user interface, handling user input, managing API responses, and ensuring the app worked well across different screen sizes.
